

# Introducing **exceed<sup>TM</sup>** **HB**

"A disruptive technology introduces a very different package of attributes from what customer's have learned to expect. exceed will disrupt the status quo of all highbay lighting."

Bill Drake, President  
Stingray Energy Systems, LLC

One **exceed** 200w metal halide fixture replaces a 400w metal halide installation, and provides higher quality light performance!

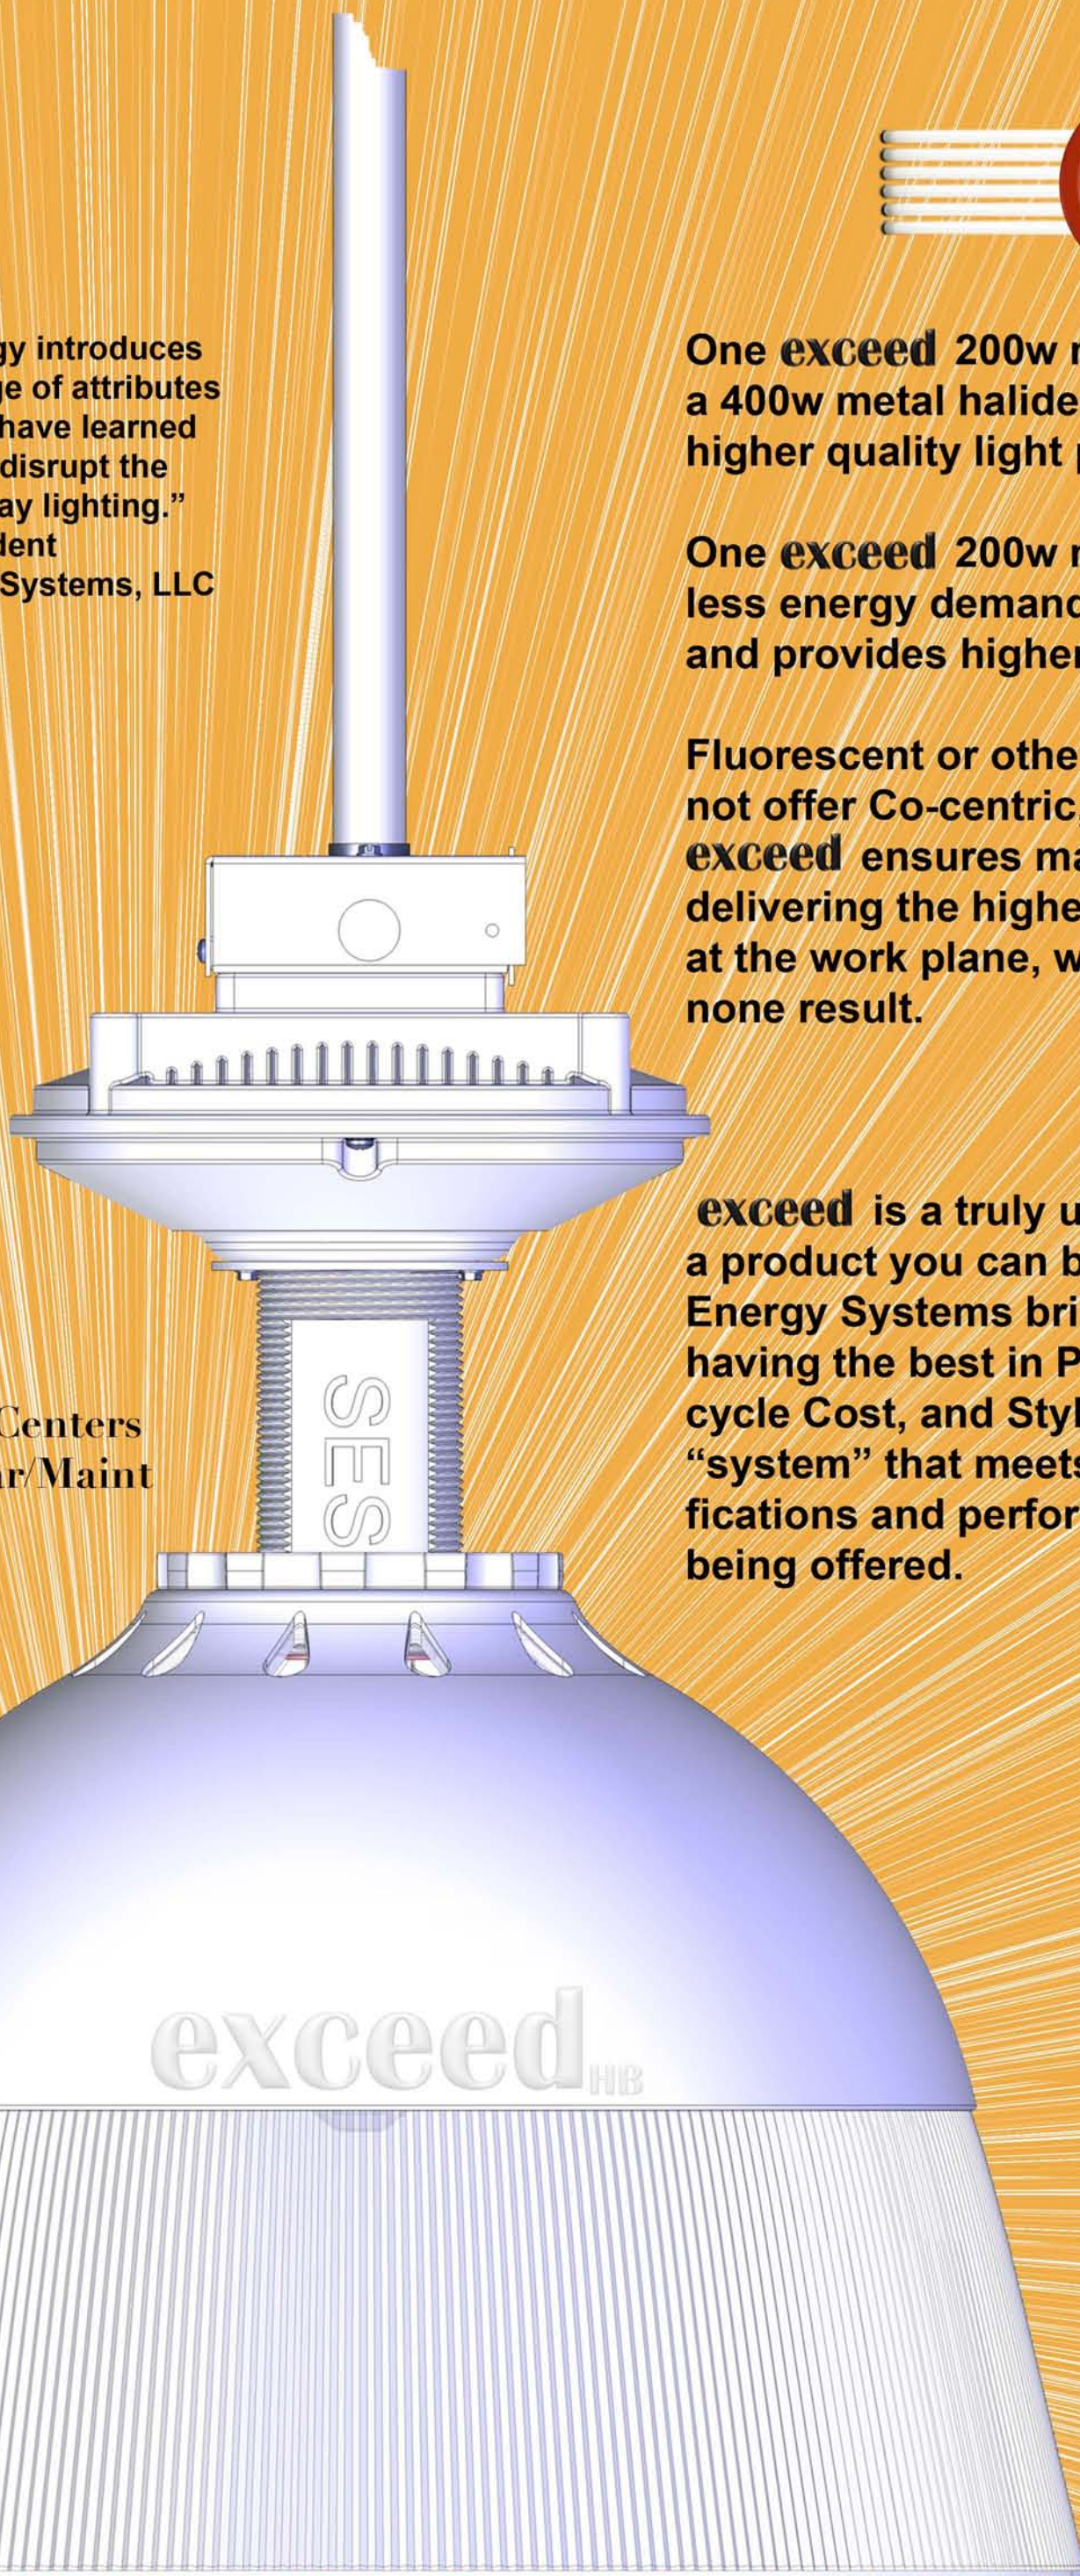

One **exceed** 200w metal halide fixture has 145w less energy demand than a 6-lamp T5 fluorescent, and provides higher quality light performance!

Fluorescent or other metal halide fixtures do not offer Co-centric, Tailored Lighting capability. **exceed** ensures maximum optical control, delivering the highest percentage of lumens at the work plane, with glare at a minimum-to-none result.

**exceed** is a truly unique High-bay luminaire, a product you can be proud to install. Stingray Energy Systems brings to market a product having the best in Performance, Versatility, life-cycle Cost, and Style. **exceed** is a new lighting "system" that meets and exceeds the specifications and performance of any HID currently being offered.

## Applications

- Industrial
- Retail
- Civic & Event Centers
- Aircraft Hangar/Maint
- Architectural

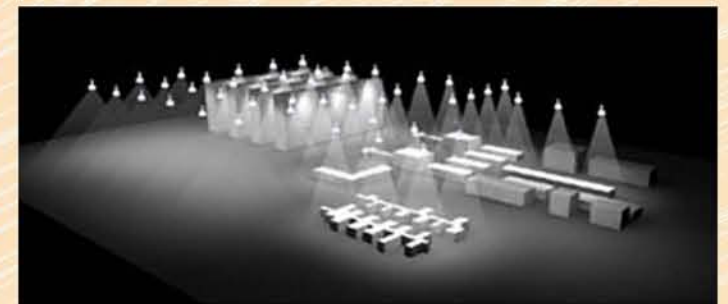

EXCEEDING THE POSSIBLE . . . SEEING IS BELIEVING!

# BEST VALUE: Stingray High-Bay Optical System

- Specification-grade light system
- Pulse Start metal halide
- Electronic ballast with high energy savings
- Two optical reflectors for co-centric optical control
- Easily adjustable mechanism permits wide-to-narrow light dispersion (2.5" stroke for full range of photometric distributions)
- Easy to install and maintain, reducing labor cost
- Non-glare, acrylic reflector, clear lamp
- Ballast compartment accessibility
- Premium construction
- Competitive pricing
- Uniquely ventilated for self-cleaning and cool running
- Improved lighting benefits employee morale and task performance
- Fixture design and styling enhances company image
- Stingray Energy Systems: a customer-focused company you can trust!

CLEAR, NON-GLARE light employs co-centric reflector methodology which, coupled with 2.5" adjustable stroke allows tailored beam of light to be adjusted from narrow to wide task light.

VENTILATION design uniquely removes dirt that normally accumulates in and on lighting fixtures.

## EASE OF INSTALLATION

exceed can easily be installed by one person. Components are readily accessible for all standard maintenance operations.

APPLICATIONS include, but are not limited to:

Industrial, Retail, Civic & Event Centers, Aircraft Maintenance. Go to [www.stingraylighting.com](http://www.stingraylighting.com) for more information.

Made in U.S.A.
